

Hummerston Engineering Ltd

Sustainability Policy

At Hummerston Engineering, we are committed to embedding sustainability into every aspect of our operations. As one of the UK's leading utility construction companies, we recognize our responsibility to minimize environmental impact, support local communities, and promote long-term economic resilience.

We are dedicated to:

- Reducing our carbon footprint and resource consumption.
- Protecting and enhancing the natural environment.
- Promoting ethical and sustainable supply chains.
- Supporting the communities in which we operate.
- Ensuring the health, safety, and well-being of our workforce.

Environmental Responsibility

To reduce our environmental impact, we will:

- **Carbon Reduction:** Aim for net-zero emissions by reducing energy use, optimizing fleet efficiency, and investing in renewable energy where possible.
- **Waste Management:** Implement a circular economy approach by minimizing waste, increasing recycling rates, and responsibly disposing of materials.
- **Water Conservation:** Reduce water consumption and manage wastewater responsibly.
- **Biodiversity Protection:** Work to minimize habitat disruption, enhance biodiversity, and protect wildlife during construction projects.

Sustainable Procurement & Supply Chain

We will ensure our supply chain aligns with our sustainability goals by:

- Partnering with suppliers who uphold ethical and sustainable practices.
- Prioritizing local sourcing to reduce transport emissions and support the UK economy.
- Encouraging innovation in sustainable materials and construction methods.

Compliance & Continuous Improvement

We commit to:

- Meeting or exceeding all relevant UK environmental and sustainability regulations.

- Regularly reviewing and updating our sustainability practices.
- Encouraging feedback from employees, clients, and stakeholders to drive continuous improvement.

Conclusion

Sustainability is integral to Hummerston Engineering's long-term success. Through innovation, responsibility, and collaboration, we will contribute to a greener, more sustainable future while delivering high-quality civil engineering solutions.

This policy will be reviewed annually to ensure its effectiveness and relevance.
